Pulse Oximeter BM1000A

For Adult, Child & Neonate

CE0123 NMPA ISO13485 FDA510K

- Palm size, light weight, easy-to-carry.
- Three types of SpO2 sensors for option.
- SpO2 value display, pulse rate value display.
- Real-time data transmission to PC and phone, real-time data storage in app.
- With function such as screen brightness setting, low-battery reminder, over-limit reminder.

Portable Patient Monitor PM6100

Features

- 6-Vital signs
- Portable, palm size
- One touch operation
- APP for Android and iOS
- Real time data transmission
- Support RPM integration
- Can be used while charging
- CE0123, ISO13485 certified

Veterinary Monitor AM6200

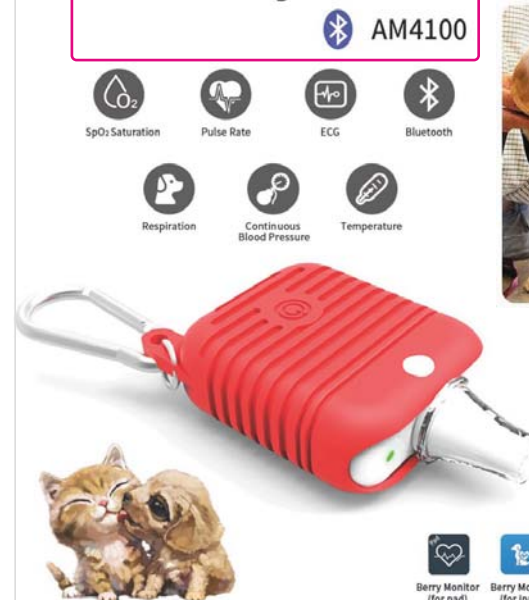

For Pets or Animal

Features

- One key operation
- Portable and light weight
- APP for Android and iOS
- Easy to operate with type-c connector
- Rechargeable battery and wireless charging
- Multi-function for SpO2, HR, Temp, ECG, RR and NIBP

Veterinary Product AM4100

Features:

- APP data transmission
- Various temperature measurement methods
- CNIBP (continuous blood pressure)
- Continuous monitoring
- Portable carry bag

Product Description:

- Small size, flexible installation method, high reliability and measurement accuracy, light weight, which makes it convenient to use in clinics and even at home.
- The weight is only 40g.
- Suitable for a variety of small animals, it is a good multi-parameter monitor for small animals and pets.
- Provide an integrated animal monitoring sensor probe to monitor various physiological indicators separately.
